

MOBILE VEHICLE BARRIERS FOR TERROR DEFENSE

Robust, modular protection systems – deployable lightning-fast and flexible, ideal for events, city centers, and critical infrastructure. **Made in Germany.**

Our Services

Fast and flexible in use

Ideal for events, Christmas markets, and the protection of sensitive infrastructure. The systems are modular, flexibly expandable, and can be deployed in the shortest possible time – setup takes only 4 minutes. In emergencies, clearance can be achieved in under 1 minute. Easy handling, mobile transportability, and seamless integration make them usable almost anywhere.

Certification

Our vehicle barriers are certified according to the strictest test procedures (ISO 22343-1:2023), patented, and licensed – with a proven **vehicle stop within 8 meters.**

Security concept with added value

Blockstahl offers certified protection against vehicle attacks and is also cost-efficient: Each barrier is equipped with integrated advertising panels, which can be used by sponsors. This significantly reduces acquisition costs for cities and municipalities. Security, advertising, and cost reduction in one.
